Software Developer

I am a high potential engineer with a passion for building slick mobile and web applications.

## EXPERIENCE

### Front End Developer — TheatreBot

May 2017 - Present

*TheatreBot is an audition and rehearsal scheduling app that simplifies the process of creating and managing theatrical productions.*

- Used the React.js JavaScript framework to quickly build a clean and responsive user interface
- Worked alongside a back-end engineer to implement RESTful APIs into the JavaScript front-end, improving the UX
- Utilized several React packages to build a scheduler/ calendar component with drag and drop editable events.

### Founder — Strange Frontier

May 2021 - Present

*Strange Frontier is an Android app that allows the user to create and use player character sheets for a tabletop RPG system I designed.*

- Utilized the React Native JavaScript framework and Google's Firebase platform to store data on users and their created characters

### Intern — Camouflaj Games

May 2019 - September 2019

*Camouflaj is a videogame studio based in Bellevue that utilizes VR technology to create groundbreaking AAA titles.*

- Working alongside the IT team, wrote Python scripts to streamline the Jira workflow for various teams
- Increased Unity C# script bug fixes by nearly 150% in development of "Iron Man VR", a PlayStation 4 Virtual Reality videogame title

## EDUCATION

### University of Puget Sound, Tacoma

September 2016 - June 2020

3.5 GPA

B.S Computer Science

Minor in Spanish

## SKILLS

### Languages and Technologies

JavaScript / React.js

React Native

Mongo/ Express / Angular / Node

HTML/CSS

Java / C / Python

Unity / C#

Linux Command Line

### Software Skills

Version Control (GIT)

Jira

Video Editing (Premiere Pro/Windows)

Office Suite

### Soft Skills

Eye for Detail

Self Motivated

Fast Learner

## FUN FACTS

Fluent in Spanish

2 Year Captain of Improv Comedy Team

Sketch Comedy Writer/Performer
